

Mexico Access

Better Connections with Latin America

Mexico Access is our new solution to facilitate conference calls with you and your participants based in Mexico.

Communication Barriers

In order to use the current numbers you must overcome some obstacles to be connected with your participants. Historically, Mexico International Toll-Free Service (ITFS) numbers may have challenged you with the following limitations:

- The numbers are often confused with U.S.-based numbers within Mexico due to the 001 number formats, spurring local carriers to charge Mexico ITFS usage at a higher international long distance rate. This service has also been subject to number blocking on local Mexico PBXs to avoid international long distance charges.
- The numbers are often restricted for mobile access and availability varies by local carrier.

Mexico Access Is the Ideal Solution

With Mexico Access, these issues are no longer a problem. To help you stay connected we offer a service that allows easy access for you and your participants to conference calls based in Mexico. With Mexico Connect, you get:

- A truly 'in-country' toll-free solution.
- A toll-free number accessible from all carriers.
- Mobile access throughout Mexico.

Begin using Mexico Access today at no additional cost to your existing Mexico ITFS number! Simply view a complete list of your dial-in numbers in SpeakSpace TCC Online and look for the 01800 formatted Mexico dial-in number.

Start having easier, more productive conferences right from your desk. You can rely on innovative products to help you conquer the struggle of keeping your communication lines open internationally.
